

Features

- Robust, attractively finished product
- Suitable for treating Acupuncture points
- Ergonomic and light weight
- Portable, professionally designed unit
- Fully compliant with International Laser Safety Standards

The AcuvetLaser™ is an ergonomically designed, light weight, robust and attractively finished laser therapy unit. With a total weight of only 85 grams (including batteries) the probe can be conveniently carried in a coat or jacket pocket. This makes the AcuvetLaser very versatile for use either at home or out in the field.

The compact design and high performance properties of the AcuvetLaser make it a highly sought after product for those wanting quick results for their star performer.

Ideal for treating Acupuncture points on greyhounds and horses, the AcuvetLaser is suitable for use by owners and trainers as well as by Veterinarians. A colour chart and easy to use treatment formulas are included.

All LasereX laser therapy units are supplied with batteries and include a 12 month warranty.
